REMARKS

Claims 1-22 are in this application. By this amendment, a minor typographical correction to claim 13 has been made. No new matter is added.

In particular, the computer file included an imbedded "Hard Backtab" code, comma and space, producing a printover in claim 13(d)(iii). This error did not show in the claim file that was used in preparing the application because the margins were different such that tab code was ignored, being to the right of the last tab setting. In fact, the error was not apparent when the claims were copied into this document until spaces were added to force relocation of the portion containing the tab code to the same place on the line as in the application.

The corrected text is also found in claim 1.

Respectfully submitted,

SHELDON & MAK
